LEONARDO DA VINCI COLLECTION

Leonardo da Vinci Collection

Leonardo di ser Piero da Vinci (April 15, 1452 – May 2, 1519) was an Italian polymath: painter, sculptor, architect, musician, scientist, mathematician, engineer, inventor, anatomist, geologist, cartographer, botanist and writer. Leonardo has often been described as the archetype of the Renaissance man, a man whose unquenchable curiosity was equaled only by his powers of invention. He is widely considered to be one of the greatest painters of all time and perhaps the most diversely talented person ever to have lived.

Mona Lisa (also known as La Gioconda or La Joconde) is a 16th-century portrait painted in oil on a poplar panel by Leonardo di ser Piero da Vinci during the Renaissance in Florence, Italy. The work is currently owned by the Government of France and is on display at the Musée du Louvre in Paris under the title Portrait of Lisa Gherardini, wife of Francesco del Giocondo.

HANDCUT DECORATION.***

***ALL THE METAL IS BRONZE GOLD PLATED 24KT PRODUCED BY LOST WAX PROCESS.

MICHELANGELO BUONARROTI COLLECTION

Michelangelo Buonarroti Collection

Michelangelo Buonarroti (6 March 1475 – 18 February 1564), commonly known as Michelangelo, was an Italian Renaissance painter, sculptor, architect, poet, and engineer. Despite making few forays beyond the arts, his versatility in the disciplines he took up was of such a high order that he is often considered a contender for the title of the archetypal Renaissance man, along with his rival and fellow Italian, Leonardo da Vinci.

David is a masterpiece of Renaissance sculpture created between 1501 and 1504, by Italian sculptor, painter, architect, poet Michelangelo. It is a 4.84 metre, 5.17 metre with the base marble statue of a standing male nude. The statue represents the Biblical hero David, a favoured subject in the art of Florence. Originally commissioned as one of a series of statues of prophets to be positioned along the roofline of the east end of Florence Cathedral, the statue was placed instead in a public square, outside the Palazzo della Signoria, the seat of civic government in Florence, where it was unveiled on 8 September 1504.

THE PRODUCTS BELONGING TO MICHELANGELO BUONARROTI COLLECTION ARE MADE MIXING HANDMADE AND HANDCUT CLEAR CRYSTAL, BRONZE GOLD PLATED 24 KT AND NATURAL MARBLES. ANY ITEM CAN BE CUSTOMIZED WITH ANY HANDCUT DECORATION.

GIOTTO DI BONDONE COLLECTION

Giotto di Bondone Collection

Giotto di Bondone (1266 - 1337), better known simply as Giotto, was an Italian painter and architect from Florence in the late Middle Ages. He is generally considered the first in a line of great artists who contributed to the Italian Renaissance.

Giotto's Campanile is a free-standing campanile that is part of the complex of buildings that make up Florence Cathedral on the Piazza del Duomo in Florence, Italy. Standing adjacent the Basilica of Santa Maria del Fiore and the Baptistry of St. John, the tower is one of the showpieces of the Florentine Gothic architecture with its design by Giotto, its rich sculptural decorations and the polychrome marble encrustations. This slender structure stands on a square plan with a side of 14.46 meters. It attains a height of 84.7 meters sustained by four polygonal buttresses at the corners. These four vertical lines are crossed by four horizontal lines, dividing the tower in five levels.

DONATELLO COLLECTION

Donatello Collection

Donatodi Niccolò di Betto Bardi (1386 – 1466), better known as Donatello, was an early Renaissance sculptor from Florence. He is, in part, known for his work in bas-relief, a form of shallow relief sculpture that, in Donatello's case, incorporated significant 15th-century developments in perspectival illusionism.

Around 1430, Cosimo de' Medici, the foremost patron of his era, commissioned from Donatello the bronze David (now in the Bargello) for the court of his Palazzo Medici. This is now Donatello's most famous work. At the time of its creation, it was the first known free-standing nude statue produced since ancient times. Conceived fully in the round, independent of any architectural surroundings, and largely representing an allegory of the civic virtues triumphing over brutality and irrationality, it was the first major work of Renaissance sculpture.

THE PRODUCTS BELONGING TO DONATELLO COLLECTION ARE MADE OF HANDMADE AND HANDCUT CRYSTAL IN PURE PINK COLOR. ANY ITEM CAN BE CUSTOMIZED WITH ANY HANDCUT DECORATION.

BOTTICELLI COLLECTION

Botticelli Collection

Alessandro di Mariano di Vanni Filipepi, known as Sandro Botticelli (1445 – 1510), was an Italian painter of the Early Renaissance. He belonged to the Florentine School under the patronage of Lorenzo de' Medici, a movement that Giorgio Vasari would characterize less than a hundred years later as a "golden age", although suitably enough, he expressed at the head of his Vita of Botticelli. Botticelli's posthumous reputation suffered until the late 19th century, since then his work has been seen to represent the line of grace of Early Renaissance painting. Among his best known works are The Birth of Venus and Primavera.

Primavera, also known as Allegory of Spring, is a tempera panel painting by Italian Renaissance artist Sandro Botticelli. Painted ca. 1482, the painting is described in *Culture & Values* as "one of the most popular paintings in Western art". It is also, according to Botticelli, Primavera, "one of the most written about, and most controversial paintings in the world." Most critics agree that the painting, depicting a group of mythological figures in a garden, is allegorical for the lush growth of Spring. Other meanings have also been explored. Among them, the work is sometimes cited as illustrating the ideal of Neoplatonic love. The painting itself carries no title and was first called *la Primavera* by the art historian Giorgio Vasari who saw it at Villa Castello, just outside Florence, in 1550.

GIOVANNI BOCCACCIO COLLECTION

Giovanni Boccaccio Collection

Giovanni Boccaccio (1313–21 December 1375) was an Italian author and poet, a friend, student, and correspondent of Petrarch, an important Renaissance humanist and the author of a number of notable works. Boccaccio is particularly notable for his dialogue, of which it has been said that it surpasses in verisimilitude that of virtually all of his contemporaries, since they were medieval writers and often followed formulaic models for character and plot.

The Decameron is a collection of 100 novellas, probably begun in 1350 and finished in 1353. It is a medieval allegorical work best known for its bawdy tales of love, appearing in all its possibilities from the erotic to the tragic.

AMERIGO VESPUCCI COLLECTION

Amerigo Vespucci Collection

Amerigo Vespucci (1454 – 1512) was an Italian explorer, navigator and cartographer. The Americas are generally believed to have derived their name from the feminized Latin version of his first name. Amerigo Vespucci was born and brought up by his uncle in the Republic of Florence.

A galleon was a large, multi-decked sailing ship used primarily by European states from the 16th to 18th centuries. Whether used for war or commerce, they were generally armed with the demi-culverin type of cannon. The galleon was an ocean going ship type which evolved from the carrack in the second half of the sixteenth century.

Filippo Brunelleschi (1377 – April 15, 1446) was one of the foremost architects and engineers of the Italian Renaissance. All of his principal works are in Florence, Italy. As explained by Antonio Manetti, who knew Brunelleschi and who wrote his biography, Brunelleschi “was granted such honors as to be buried in the Basilica di Santa Maria del Fiore, and with a marble bust, which they say was carved from life, and placed there in perpetual memory with such a splendid epitaph.

The famous dome by Brunelleschi is the coverage of the cruise of the Florence Cathedral is the largest masonry dome ever built (the longest diagonal of the inner dome 45 meters, the exterior: 54) His size prevented the traditional method of construction with the help of hundreds, which has sparked an array of assumptions about the construction technique used.

THE PRODUCTS BELONGING TO FILIPPO BRUNELLESCHI COLLECTION ARE MADE OF HANDMADE AND HANDCUT CASED CRYSTAL IN AMBER AND BLUE COLOR. ANY ITEM CAN BE CUSTOMIZED WITH ANY HANDCUT DECORATION.

ALL THE METAL IS BRONZE GOLD PLATED 24KT PRODUCED BY LOST WAX PROCESS. AFTER THE FINISHING THE BRONZE IS PROTECTED TO AVOID ANY OXIDATION OF THE GOLD OR CHANGING COLOR

DANTE ALIGHIERI COLLECTION

Dante Alighieri Collection

Dante Alighieri (1265 – 1321), commonly known as Dante, was an Italian poet of the Middle Ages. He was born in Florence; he died and is buried in Ravenna. The name Dante is, according to Jacopo Alighieri, a hypocorism for Durante. In contemporary documents it is followed by the patronymic Alagherii or de Alagheriis; it was Boccaccio who popularized the form Alighieri. In Italy he is known as "the Supreme Poet" (il Sommo Poeta) or just il Poeta.

The Museum of the Casa di Dante is located in one of the oldest parts of the historic center of Florence, Via Santa Margherita. Dante himself wrote that he was born in the shadow of the Badia Fiorentina in the parish of St. Martin, although it is not sure exactly where the building is now houses the museum. The nearby church of Santa Margherita de' Cerchi is the place where the poet for the first time he met Beatrice Portinari.

THE PRODUCTS BELONGING TO DANTE ALIGHIERI COLLECTION ARE MADE OF HANDMADE AND HANDCUT CRYSTAL IN PURE BLACK COLOR. ANY ITEM CAN BE CUSTOMIZED WITH ANY HANDCUT DECORATION.

ALL THE METAL IS BRONZE GOLD PLATED 24KT PRODUCED BY LOST WAX PROCESS. AFTER THE FINISHING THE BRONZE IS PROTECTED TO AVOID ANY OXIDATION OF THE GOLD OR CHANGING COLOR

ARNOLFO DI CAMBIO COLLECTION

Arnolfo di Cambio Collection

Arnolfo di Cambio (c. 1240 – 1300/1310[?]) was an Italian architect and sculptor. In 1294–1295 he worked in Florence, mainly as an architect. According to his biographer Giorgio Vasari, he was in charge of construction of the cathedral of the city, for which he provided the statues once decorating the lower part of the facade destroyed in 1589. The surviving statues are now in the Museum of the Cathedral.

The tomb for Cardinal de Braye was created by Arnolfo di Cambio, a pupil of Nicola Pisano and collaborator of his son Giovanni, for the Church of San Domenico in Orvieto in 1282.

THE PRODUCTS BELONGING TO ARNOLFO DI CAMBIO COLLECTION ARE MADE OF HANDMADE AND HANDCUT CASED CRYSTAL IN CLEAR/AMETHYST OR CLEAR/GREEN OR CLEAR/RED COLOR. ANY ITEM CAN BE CUSTOMIZED WITH ANY HANDCUT DECORATION.

ALL THE METAL IS BRONZE GOLD PLATED 24KT PRODUCED BY LOST WAX PROCESS. AFTER THE FINISHING THE BRONZE IS PROTECTED TO AVOID ANY OXIDATION OF THE GOLD OR CHANGING COLOR
